Letter of Recommendation for Chris Troutner SSN 544-17-7781

I am happy to have the opportunity to write this letter for Chris Troutner. Chris is currently a student in my Electrical Circuit Analysis III class. He was also in my Electrical Circuit Analysis I and II classes this year.

Chris is a delightful person who is very interested in his studies. He works well with his lab partners and always makes sure he does his fair share of the experiment. When there is a need for help or clarification he comes to me for an explanation. This is true for both lab and homework assignments. Chris is especially interested in using his skills learned in his electronics classes toward building small robots. He has come to me several times this term to help resolve specific design issues with his robot.

Chris has done well in his Circuits I and II classes earning the grades of A and B respectively. He is developing good lab skills that will serve him well in his electronics career. His attendance is excellent and he always participates fully in class discussions.

It is always a pleasure having Chris in my class and I am certain he will be very successful in his engineering career.

Sincerely,

P.O. Box 19000
