

To whom it may concern:

Re: letter of recommendation for Chris Troutner

I've had the pleasure of instructing Chris this semester in my Visual Basic Class at the Owen Sabin Skills Center, a professional / technical program shared between high schools in the North Clackamas School District.

Chris has demonstrated an already in place knowledge of many aspects of the IBM PC, and demonstrated quite a talent for programming.

While Chris may have much to learn before becoming a programmer, I feel that his cooperative, friendly manner and his willingness and ability to figure out complicated concepts with little or no supervision would make him a valuable employee in almost any capacity.

If you have any questions about Chris, please feel free to call or e-mail me!
